

Dear FCC, I feel as though it should not be up to the National Association of Broadcasters to say what should or should not be aired on XM Satellite Radio. I have benefited from traffic and weather reports on XM and my father is a truck driver so it's important for him to know the weather conditions and news around the country. I pay for this service and feel it is unfair for someone else to take these two things away from me as they are very helpful to me and my family. Please reject the National Association of Broadcasters petition 04-160 to ban these channels from xm.

Thank You, Peter C.
